SUMMARY

Motivated IT professional with hands-on experience in ERP development (Dynamics 365 Business Central), Java Full Stack projects, and data visualization using Power BI. Skilled in customizing Business Central with AL language, implementing BC–CRM integrations, and building Power Automate flows for business process automation. Proficient in SQL and data analytics, with a proven ability to deliver innovative and data-driven solutions. Strong communicator with experience in both technical development and client-facing roles.

SKILLS

ERP & Automation: Dynamics 365 Business Central (AL Language), CRM, Power Automate, SharePoint Integration
Programming Languages: Java (Spring Boot, Hibernate, JDBC), Python, SQL
Data Visualization: Power BI, Tableau, Excel (Power Query, DAX, Pivot)
Soft Skills: Analytical Thinking, Problem-solving, Communication, Team Collaboration

WORK EXPERIENCE

ERP Technical Consultant   *Apr 2025 - Present*

- Customized Business Central using AL: created/extended tables, pages, reports, and codeunits.
- Developed event subscriptions to implement custom logic without modifying standard objects.
- Built document/list pages, FactBoxes, and Role Centers to enhance usability.
- Worked on BC–CRM integration for synchronizing customer and sales data.
- Designed Power Automate flows for CRM-side automation (file handling, emails, SharePoint integration).
- Collaborated with teams to deliver ERP solutions aligned with client requirements.

PROJECTS

Banking Management System (KodNest)   *Feb 2025*
Technologies: Java, Hibernate, Oracle SQL
- Developed a banking application where users can create new accounts, log in, check balances, transfer amounts, and log out securely.
- Implemented user authentication to ensure secure transactions and account access.

Power BI Hospitality Project - Week-over-Week Analysis   *Sep 2024*
Technologies: Power BI, Power Query, DAX
- Analyzed key metrics such as Revenue, Occupancy, ADR, and RevPAR.
- Processed raw data and built relationships in Power Query.
- Created calculated fields using DAX formulas and developed insightful visualizations to track performance trends.

Enhancing Product Innovation Through Advanced Aspect-Based Sentiment Analysis (UWS)   *Dec 2024*
Technologies: Natural Language Processing
- Conducted advanced research on using Aspect-Based Sentiment Analysis (ABSA) for improving product innovation.
- Applied Natural Language Processing (NLP) methodologies to analyze customer reviews and derive actionable insights.
- Evaluated the ABSA methodology's performance and recommended its integration into product development strategies.
